

The journey of MyPup becoming a Certified B Corp®

In 2022 MyPup has saved 81,994 kg of CO₂ and nitrogen. *

That's as much as flying 603 times from Amsterdam to London.

By 2022, this has already saved a total of 303,755 km in rides.

Our lockers are made from recycled steel thanks to our partner Vepa.

100% emission-free because we drive with electric transport in our own hub.

BREEAM NL

The installation of a Pick-Up Point counts as an innovation mark in the BREEAM hallmark certification.

We work with suppliers who are committed to employees with a labour market disadvantage.

On a yearly basis, MyPup contributes to charities. In 2022 this was for refugees from Ukraine.

Our delivery drivers have fair working conditions and are permanently employed by us

The MyPup team volunteers to reduce opportunity inequality.

These steps and more contributed to our B Corp certification!
